Nationality: Kenyan

PROFESSIONAL PROFILE

Motivated and customer-focused Information Technology graduate from Dedan Kimathi University of Technology with hands-on experience in IT support, customer assistance, software development, and technical troubleshooting. Skilled in delivering exceptional customer service by resolving inquiries efficiently, communicating clearly, and providing professional support in fast-paced environments.

A proactive and dependable team player with excellent interpersonal, multitasking, and problem-solving skills. Experienced in assisting end users, managing technical issues, and maintaining a positive customer experience through patience, attention to detail, and effective communication. Quick to learn new systems and committed to delivering high-quality service while contributing to organizational success.

CAREER OBJECTIVE

Motivated and detail-oriented IT professional seeking an opportunity in a dynamic organization where I can apply my skills in software development, IT support, networking, and cybersecurity. Eager to contribute to innovative projects, improve system performance, and continue growing in modern technologies including IoT, AI, and mobile development.

EDUCATION

Dedan Kimathi University of Technology

Bachelor of Science in Information Technology (BSc IT)
2022 – 2026

Kebirigo High School

Kenya Certificate of Secondary Education (KCSE) 2018
– 2021

Nyakwerema Primary School

Kenya Certificate of Primary Education (KCPE) 2012

– 2017

PROFESSIONAL EXPERIENCE

Software Developer & IT Support Intern iGamingAfrica

- Developed and maintained web and mobile applications to improve performance and user experience
- Designed responsive user interfaces and integrated RESTful APIs with database systems
- Collaborated with development teams to build secure and scalable software solutions
- Provided IT support by troubleshooting hardware, software, and system-related issues
- Assisted in system testing, maintenance, and end-user support

Information Technology Support Specialist Intern CryptAfrica

Provided technical support for hardware, software, and network issues.

- Installed, configured, and maintained Windows systems, printers, and business applications.
- Performed computer repairs, system maintenance, and user account support.
- Applied IT security best practices and resolved technical issues to minimize downtime.

PROJECTS

SMART IoT-Based Water Quality Monitoring & Flow Control System (Final Year Project)

- Designed a real-time IoT system for monitoring water quality and flow levels
- Integrated sensors for automated data collection and remote monitoring
- Improved water usage efficiency and reduced wastage through automation

AI for Cybersecurity (Group Project)

- Developed an AI-based system for detecting cybersecurity threats
- Applied machine learning techniques to identify vulnerabilities
- Participated in testing and system optimization

SmartSeason Field Monitoring System

- Built a system for tracking crop progress across multiple farms
- Designed features for seasonal agricultural data recording

- Enabled data-driven farming decisions through structured tracking

Smart Job Tracker System

- Developed a job tracking system for managing applications and progress
- Implemented task and status tracking features for workflow organization
- Improved visibility of application stages for users

SchoolWallet System

- Created a school finance management system for tracking payments and records
- Designed modules for fee tracking and financial reporting
- Improved transparency and financial organization in schools
